# CATALANO®

La collezione di piatti doccia H3 declina nuove soluzioni tipologiche su 8 formati, prendendo spunto nel nome dalla dimensione dello spessore. Pendenze corrette per il deflusso dell'acqua, bordi sufficientemente larghi per alloggiare cabine doccia, e sistema antiscivolo efficace, sono i punti di forza dei nuovi piatti doccia. Tutti i prodotti sono installabili in appoggio o a filo pavimento e sono smaltati con lo speciale Cataglaze®+ che garantisce un'efficacia antibatterica del 99,99%.

The H3 collection provides new typologies of shower trays in 8 sizes, named after the shower tray thickness. The strengths of the new shower trays are right slopes for the water flow, edges large enough to install the shower box, and an effective anti-slip pattern. All the shower trays are suitable for floor and above floor installation and are glazed with special Cataglaze®+ treatment, providing 99.99% of effective antibacterial action.

Thickness 3 cm

# Spessore 3 cm

Un attento ed accurato studio del deflusso dell'acqua si concretizza nel minore spessore possibile per garantire funzionalità e leggerezza.

A careful and accurate study of the flow of water takes the form of the lowest possible thickness to ensure functionality and lightness.

Different Installations

# Differenti installazioni

Appoggio • Above floor-level

Filo pavimento • Floor-level

Nell'installazione in appoggio, la perfetta planarità dei bordi permette un'impeccabile aderenza alle superfici del pavimento.

Above floor-level installation, the perfect flatness of the surface and edges allows an impeccable adherence to the floor surfaces.

Per la soluzione a filo pavimento le raggiature minime degli spigoli consentono un'eccellente continuità con il pavimento.

For the floor-level solution, the minimum radius of the edges allow excellent alignment to flat surfaces with the floor.
